Glass Partitions/Room Dividers

Glass partition is a concept to divide the available large space into convenient and desired partitions. Various partition angles are achieved with the glass partition concept with the help of toughened glass. The process of glass partition is designed by architecture based on the purpose and convenience of the end users. Large scopes of commercial and residential spaces can be segmented as glass partition.

Shower Enclosures

Shower enclosures are shower partitions made to divide wet and dry areas between the shower area and the rest of the room space. Shower enclosures are one of the leading glass interior concepts for residential customers. Shower enclosures are highly custom-made based on individual location and space available for the shower enclosures. There are many designs of shower enclosure like 180-degree shower enclosure, 90-degree shower enclosure and pentagon type shower enclosure.

Glass Balustrade/Fencing Systems

SHS glass balustrades are designed with far more than safety in mind. In commercial and domestic settings, they are the design refinements that turn functional into a feature. They allow light to flow freely into a room. They create the illusion of space. They're simple to clean, and a pleasure to live and work with. On interior and exterior stairs, balconies and banisters, discover the difference a glass balustrade can make to your space.

- Design Sand Blasted Glasses

ALUMINIUM PARTITIONS & CLADDING

Aluminium Partitions

This is the most cost effective and flexible solutions of the partitioning ranges. Such partitions prove themselves to be very durable, demountable and relocatable. Aluminium Partitions are available in solid, part or fully glazed elevations.

UNITED

GLASS & ALUMINIUM

Aluminium Windows & Doors

Aluminium Doors & Windows are resistant to corrosion as they are coated with aluminium and not necessary to paint repeatedly. It can be of different colours, patterns and designs. The doors we deal are made using high quality aluminium which makes them reliable, tough and long life function.

Facades/Curtain Wall

Facades or Curtain wall system combines glass, either transparent or spandrel or both, and vertical and horizontal mullions acting as structural members to transfer wind and gravity forces to building structure. Custom or standard unitized or stick framed, double skin or fin facades, framed or frameless structurally glazed system are designed.

Aluminium Composite Panel (ACP)

Aluminium Composite cladding or ACP is typically a metal curtain wall system. ACP is made from lightweight Aluminium with Hard Insulation. With a huge selection of finish types and colours. ACP is used for exterior cladding, column covers, interior wall and partition panels.

Canopy:- Canopies are designed for style and functionality, canopies provide excellent protection from the element without the need for columns or foundations.

Skylight/Roof Windows

Skylights are light transmitting fenestration forming all, or a portion of, the roof of a building's space for day lighting purposes. Sometimes skylight can enhance ventilation and reduce electricity cost for lighting.

Automatic / Manual Sliding Door

Sliding Doors are horizontal doors having single or two adjacent panels that can slide over one another. They are placed over a track and have roller underneath to slide over track. It can be Manual or Automatic operation.
